

Paddock Space Allocation at 2020 A4DE

There are 2 row sizes in the paddock. Most are 12m deep, if you have a container, large truck, big group, etc these are for you. If you are single, or a group of 2 or 3, then 7m deep rows are what you need (shade in front, trailer behind).

Some of the area is hard stand and flat and is very hard, other parts are on grass with a slight slope.

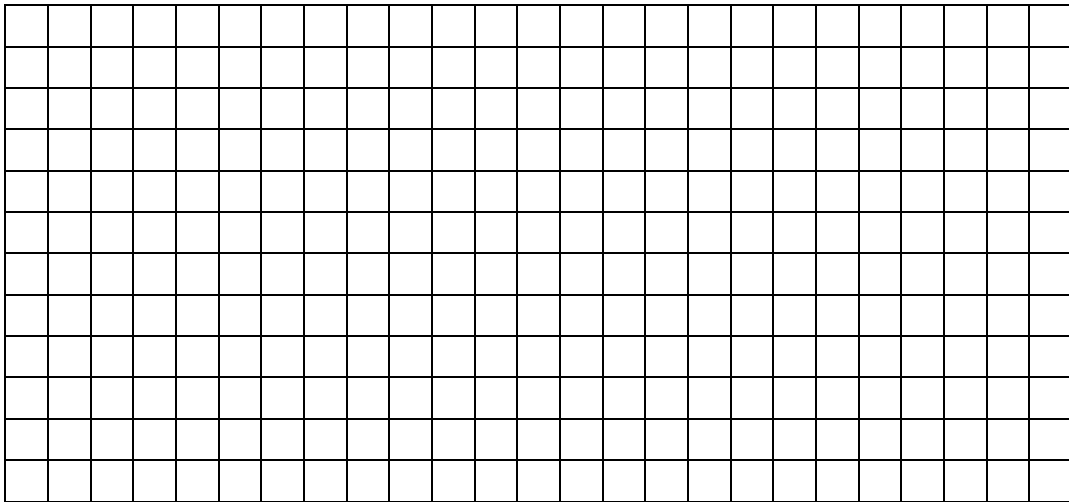

Camping is not permitted in the paddock area.

There is no water or power supply to these sites.

When working out your requirements, please be realistic. Space at the venue is not unlimited.

If you have booked a container, then we need to know where to put it on you space. Generally containers will go on hard stand area.
